

SLIP

SLIP is the name of the faculty of mechanical engineering's days. This is one of the oldest event in the faculty. SLIP is held in every spring semester, usually in the 11. week.

This week invigorates the mood of the machinists, builds the faculty community and provides a great opportunity for relaxation for those who visit the evening concerts. A wide range of music and a good atmosphere make this event memorable.

You will receive an invitation from the event in time with the exact date, location and information.

If you have any questions, you can contact us at international@ghk.bme.hu.
